

ONYX PIB 2400

POLYISOBUTENE

DESCRIPTION:

ONYX PIB 2400 is a high molecular weight polyisobutene used in automotive lubricants and other industrial applications. It is colorless, chemically inert, non-drying and highly resistant to oxidation and UV degradation.

PHYSICAL / CHEMICAL CHARACTERISTICS

Parameters	Test Methods	Specifications
Viscosity@ 100°C, cSt	ASTM D445	4200 – 4900
Density @15 °C	ASTM D1298	0.910 – 0.930
Flash Point, °C	ASTM D92	Min 170

GENERAL HANDLING INSTRUCTIONS:

Neoprene or nitrile rubber gloves and safety goggles should be worn for handling. Material safety data sheet should be consulted for specific information and for information on health and safety.

NOTE

If you require further information, please contact your regional Onyx representative.
