

ONYX PRISMA 5522

DESCRIPTION

PRISMA 5522 is an aqueous solution of dissolving agents.

APPLICATION

PRISMA 5522 can be used to clean pipework and vessels contaminated with iron-based deposits and can be applied neat, or as a dilute solution, with a soak period ranging from 6 to 24 hours. PRISMA 5522 has previously been used in water injection systems, duration towers, and various vessels.

TYPICAL PROPERTIES

Appearance: Colorless to pale yellow liquid

Specific Gravity: 1.20 - 1.25

pH 10% in D.I. Water: < 5
