

ONYX WETPRO 7000

PRODUCT DESCRIPTION

WETPRO 7000 is a blend of modified treated vegetable oil used as a wetting agent.

Physical Parameters	
Appearance	Dark Brown Liquid
Sp. Gravity@ 25°C	0.90-0.95
Flash Point (PMCC)	> 115 °C

FEATURES AND BENEFITS

WETPRO 7000 is wetting agent for all types of oil based mud system.

WETPRO 7000 adsorbs on to mineral surfaces, reducing interfacial surface energy and rendering Barites and other weighing material and all types of solids.

WETPRO 7000 is an ideal surfactant for low colloid, relaxed invert oil mud system.

RECOMMENDED TREATMENT

WETPRO 7000 is used from 1 to 10 lbs/bbl. depending on mud weight, oil water ratio, and rate of penetration.

WETPRO 7000 required lime for activating, avoid excess concentration of WETPRO.

SAFETY PRECAUTIONS

WETPRO 7000 has to be handled as an industrial chemical, wearing protective equipment.

PACKAGING

WETPRO 7000 is packed in 55-gallon steel drums or 5- gallon pails. Customized packaging is also available
